

Powerful  
Paradox  
Optimization  
System

Achieve higher operating profit margins, quality and efficiency

# Oil and Gas Operations

**POSy-System™ is a self-contained Optimization Software Engine and Platform**

**POSy-System™ increases production, quality, and optimizes efficiency, resulting in increased profit margins and lower costs**

- *Significantly Increased Productivity & Efficiency*
- *Increase Operating Profit Margins & EBITDA*
- *Reduce Manufacturing Costs*
- *Improve Product Quality*
- *Reduce Waste*
- *Reduce Process Variability*
- *Reduce Overall Costs*

**In Business Alliance with:**

**SAROM GLOBAL**

**PLANT ENGINEERING & REMEDIATION  
PROJECT, OEM & VENDOR SUPPORT**

The POSy-System™ focuses on

*Customer Key Performance Requirements*

By using our proprietary

**Optimization System**

you can increase Productivity, efficiency and quality

## Testimonial: Major Pharmaceutical Company

“I used your Paradox software engine on a tool that has been in production for over a year. I have had a **huge reduction in cycle time by 23%**.”

“This software is user friendly compared to the software I have used in the past. The results are quick and easy. The QA Department has accepted the changes a lot faster, since there is a full report once trials were completed. It was easier for my management staff to see the results rather than me trying to explain the changes to process. Thanks”

**-Troy Cook, Production Manager  
Starplex Scientific, d/o Apotex**

**PARADOX ENGINEERING  
& TECHNOLOGY**

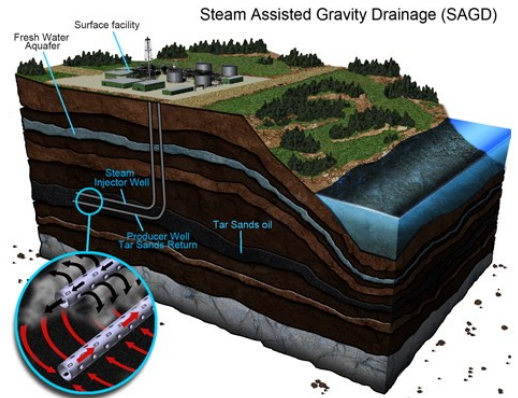

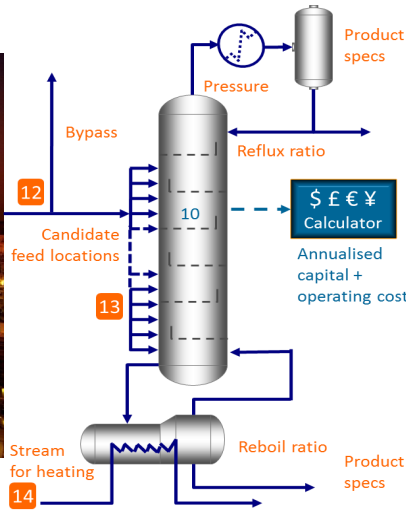

Powerful  
Paradox  
Optimization  
System

Achieve higher operating profit margins, quality and efficiency

# Oil and Gas Operations

The **POSy-System™ (Paradox Optimization System)** software recommends specific **Optimized Processing Set Points** to meet your performance requirements even through dynamic variation!<sup>1</sup>

## Our Goal is to Optimize the Following Key Items:

Get positive results in the black with our POSy-System™.
